F_3 and $B = F_3 \cup F_4 \cup F_5 \cup F_6$ are not mutually exclusive, since the outcome F_3 belongs to both of them. On the other hand, the events $A = F_3$ and $C = F_1 \cup F_2$ are mutually exclusive. The union $A \cup B$ of two events A and B is an event that occurs if at least one of the events A or B occur. The key word in the definition is "at least one".

 Chance and Probability – Probability Scale
 When 100 people are surveyed, it is likely that chocolate will be the favourite milkshake flavour of 38 people. When 1000 people are surveyed, it is likely that chocolate will be the favourite milkshake flavour of 380 people. Chance and Probability 4th, 2024.

Chapter 2 Probability and Probability

Distributions
 Example 2.3 The probability distribution of travel time for a bus on a certain route is:

Travel Time (minutes)	Probability
Under 20	0.2
20 To 25	0.6
25 To 30	0.1
Over 30	0.1

 The probability that travel time will exceed 20 minutes is 0.8. We shall always assume that the values, intervals, or categories listed are mutually exclusive.
