### **Relative Velocity In One Dimension(application)**

1. One of the most important thing in solving problems of relative motion is about visualizing measurement. If we say a body "A" has relative velocity " $v$ " with respect to another moving body "B", then we simply mean that we are making measurement from the moving frame (reference) of "B". 2. The concept of relative velocity applies to two objects. 4th, 2024
